

TECHNICAL DATA SHEET

70% HYDROCURE ZINC OXIDE (DRAFT)

70% Hydrocure Zinc Oxide is a stable aqueous dispersion of Zinc Oxide and used as an Activator for both Synthetic & Natural Rubber Latices supporting Sulphur Vulcanisation.

Stabiliser in Water Based Contact Adhesives.

Provides Preservative properties in Paper & Wood applications.

70% Hydrocure Zinc Oxide conforms to FDA 21CFR 177.2600 (Rubber Articles intended for Repeated Use) & EC 1935/2004.

PROPERTIES	SPECIFICATION
Appearance:	Odourless White Liquid
Viscosity (dPs):	50 (+ / - 10)
pH:	8.5 – 11.0
Specific Gravity:	2.52
TSC (%):	72 (+ / - 2)
Solubility:	Miscible in Water
Particle Size (% <1 μ m)	92

PACKAGING:

60 L Mausers, 125 & 200 L DRUMS
